## PERSONAL PROJECTS

### Microservices based Library Management System (10/2022 - 01/2023) [🔗](#)

- The library management project is a web-based application that allows librarians to manage their library's inventory and lending activities.
- Built using Java and Spring Boot framework for implementing RESTful APIs and microservices architecture.
- The application supports multiple user roles with different levels of access privileges, such as librarian, administrator, and student.

### Clone Of Instagram Web-App (03/2023 - 05/2023) [🔗](#)

- Developed a full-stack Instagram clone using React, Java, Spring Boot, and MySQL technologies.
- Designed and implemented the front-end of the Instagram clone using React, creating a responsive and visually appealing user interface.
- Utilized Java and Spring Boot to build the back-end of the application, implementing RESTful APIs for user authentication, profile management, and post creation.
